

T1100 Series Room Thermostats

Features

- Aesthetic styling
- Constant and close temperature differential provided by bellow-type sensor
- No heat anticipators required
- System "OFF" position breaks all circuits
- One model for either 2-pipe or 4-pipe manual cool-off-heat application
- All slide switches for ease of operation
- Easy to wire to numbered terminals

General

The T1100 Series room thermostats are available in 2 basic models for low or line voltage control of valves, relays and fan motors in fan coil units, heat pumps and packaged units for commercial, industrial and residential installations.

The thermostat operates an on/off valve to maintain room temperature at the desired set point.

While Model T1103 is factory set for 2-pipe manual cool-off-heat application, removing the wire jumper between Terminals 4 and 5 will convert the thermostat to 4-pipe manual cool-off-heat application.

Mounting

The T1100 Series room thermostats can be surface mounted or secured to a standard American 2"x 4" single gang box or a standard European 75 x 75 x 35 mm electrical box. See Fig. 2: Mounting Details. Two mounting screws are included.
